Patients by small area boundary table

Which boundary a patient resides in was determined using UGRC's geocoding API. These counts do not include PO Box addresses or addresses entered in a format that the API cannot parse. Boundaries with 11 or fewer patients will have NA as their count.

Cardholder growth

'New Patients Per Month' are new unique patient activations per month. Patients in these counts may no longer be active.

'Activated Per Month' Counts are based on *current* active patients. The month is determined by when they were first made active. Since these counts are based on current active patients, counts in previous months may change as patients expire and renew.

'Expired per Month' Counts are based on currently expired patients organized by the month of their most recent expiration.

The 'Most recent renewal' counts are current active patients organized by the month of their most recent card renewal. Patients who have never renewed are excluded.

'Most Recent Activation or Renewal' is all currently active patients organized by their most recent renewal or activation, if their activation is more recent.

Delivery monthly

Delivery data is retrieved from MJ Freeway. Totals prior to November 2021 may be incomplete.
