Patients by small area boundary table

Which boundary a patient resides in was determined using UGRC's geocoding API. These counts do not include PO Box addresses or addresses entered in a format that the API cannot parse. Boundaries with 11 or fewer patients will have NA as their count.

Cardholder growth

'New Patients Per Month' are new unique patient activations per month. Patients in these counts may no longer be active.

'Activated Per Month' Counts are based on *current* active patients. The month is determined by when they were first made active. Since these counts are based on current active patients, counts in previous months may change as patients expire and renew.

'Expired per Month' Counts are based on currently expired patients organized by the month of their most recent expiration.

The 'Renewals Per Month' is the count of unique patients who had a card renewed any given month. Patients who have never renewed are excluded.

'Activations and Renewals per Month' is the count of unique patients who had either a card activated or renewed any given month.
